

Printer Setup:

Paper Type: Card Stock (110 lb)

DO NOT scale to fit paper.

Using a rotary cutter and ruler, horizontally cut across the top and bottom of each row to make four rows of hexies. Then use scissors to cut off the remaining triangle sections between each hexie template. OR, cut the rows diagonally to make gems. Punch a hole in the middle of each paper hexie with a paper punch for pinning and easier removal from the fabric after sewing. © 2013 SewQuickly.com All Rights Reserved.
